

Activity Frame

Pack contents:

Activity Table

2x Table top inserts with chalkboard backs

2x Bowls

1x Large Chalkboard

1x Large Tray

The activity table has been designed to allow for varied, flexible and imaginative use. The inserts can be used in a variety of combinations to increase the potential of the play. These inserts can be removed by reaching under the table and gently pushing the undersides up.

The two table inserts fit into the opening to allow the table to be used as a flat normal table, or if placed in upside down they can be used as chalk boards. The wooden battens on the underside have rebates of two different sizes that allow either laminated sheets or whiteboards to be slotted in and held in place.

The large chalk board and the large tray should be slotted into the table with the larger portion extending to the outside edge.

In this way other inserts can be accommodated beside it.

The bench seats can be pushed in to allow the children to work standing, which increases physical development. The bench seats can be removed to allow greater access to children requiring seating aids. To remove the seats, unscrew the two screws in the end of each runner and remove the screw stop, take off the end of the runners. Slide out the bench then replace the end of the runners for safety.

To clean the table, chalkboard or trays use a soft cloth and water; **do not use abrasive cleaning products**. Where sand has been used in the tray, **dry** the sand and gently brush it out to prevent excessive scratching of the varnish which would reduce the longevity of the product.

The table is made of naturally durable wood, however it has been coated with a natural totally non-toxic marine varnish (Le Tonkinois) in order to make it more easy to wipe away pen and to help it to shed water. It is suggested that the table is re-varnished as needed in order to preserve the look and life span of the table.

If you require any further advice please contact us on 0113 2556342.

Also available and compatible with the activity table.

- Set of 5 Tactile Boards.

5 different carved patterns designed to develop sensory, physical and pre-writing skills.

- Set of 5 Nature Texture Boards

5 different carved boards designed to develop sensory development and used in conjunction with nature studies and exploration.

- Set of 4 Number and Letter Boards.

2x boards with number lines 1-10 on one side and 1-5 with dots corresponding to the number on the reverse. Two sections orientated allow children to work on either side of the table.

2x boards containing numbers a-z. Two sections orientated allow children to work on either side of the table.

These boards allow children to trace with their fingers the characters shapes develop writing skills and use as number lines for counting. The boards are ideal for use with sand tray or chalk boards to develop numeracy and literacy skills.

Sets sold in packs or separately.
